

Gola  
8100

# Gola Continuous Handle

The Gola continuous handle profile features a rounded design and small width creating a subtle and elegant effect in the kitchen.

The profile is designed to be smaller in width than most profiles making it subtle and elegant but further saving you cabinetry space. The unique feature of the rubber strip also acts as a 'soft-close' for your cabinetry, and is completely hidden when the drawer is closed.

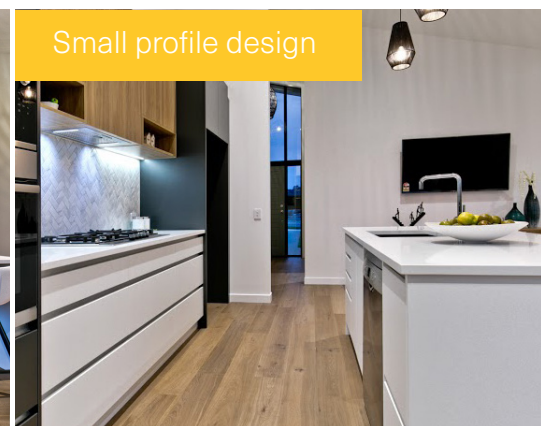

Soft-close rubber strip

Minimalist look

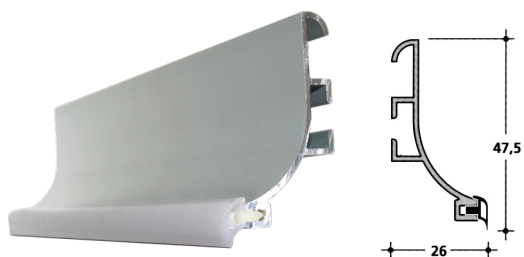

Small profile design
